

HELPING AMERICANS GET HEALTHY AND STAY HEALTHY DURING THIS UNPRECEDENTED TIME.

America's leading doctors, nurses, clinicians, hospitals, health insurance providers, biopharmaceutical companies and employers are committed to working together in this unprecedented time, to ensure every American receives the care they need and deserve.

The Partnership for America's Health Care Future has assembled new resources for the general public to learn more about the steps the free market and government are taking to help Americans get healthy and stay healthy at this important moment. As we move forward together, we will update these materials with the latest facts and information.

Since the onset of this crisis, our members have quickly mobilized to address the spread of COVID-19, both in their individual roles and by working together to expand access, improve quality, strengthen employer-provided coverage, protect our most vulnerable, and preserve patients' choice and control.

EXPAND ACCESS: In many states, special enrollment periods are providing millions of Americans with access to affordable, high-quality coverage at this critical time.

IMPROVE QUALITY: Private health care companies are working to get Americans the innovative tests, treatments, and vaccines they need today.

STRENGTHEN EMPLOYER-PROVIDED COVERAGE: For the more than 180 million Americans who rely on employer-provided coverage, many insurers are waiving costs and providing critical resources to meet this challenge.

PROTECT OUR MOST VULNERABLE: The private market is working to fill gaps for our most vulnerable.

PRESERVE CONTROL: The private market is empowering patients to choose where and how they receive care – from telehealth to drive-up clinics, to hospitals and more.

To learn more about how we are working together to help Americans get healthy and stay healthy and provide access to affordable, high-quality health coverage and care, visit:
